

# Connected Energy

Secure Always-on Connectivity Managed by WWT

## Your Smart Energy Solution

Digi IoT connectivity is ideal for energy operations that are widespread, complex, and often hazardous – the essence of mission-critical.

## Modernizing the Energy Industry with WWT

The WWT Energy Practice brings its deep expertise across the various lines of business in this industry and key technology domains to bare in the form of a wide range of business-centered technology solutions.

**Digi Containers** empower companies to easily build, deploy and monitor custom applications on devices running DAL OS. With Digi Containers you can “containerize” applications, so they are lightweight, portable and secure.

**Digi WAN Bonding** is a WAN bonding technology enabled through Digi Remote Manager® to provide increased performance, WAN smoothing, packet redundancy and seamless failover.

**Digi Mobile VPN** creates a persistent, secure connection between agency data centers, a Digi router, and connected smart devices, and adds enhanced security and connection reliability to existing devices.
